Group Meeting Summary – OCT 8th, 2020

Attendees:

Milad Chenaghlou
Lin Mi
Tingli Qiu
Spoorthi Suresh Avvanna
Chitra Naga Durga Sindhusha Veluguleti
Yuhan Zhao

Key Points Discussed:

- Feed back for the presentation
    - We can add photos or just the icons of the names
    - Scope-No -ve effects on our project because, this clause is only for the teams those who didn't get their data because of covid-19
    - Introduction-looks good
    - Key ds question-Team should be able to describe what the problem is ? and why its is not easy to solve,i.e athlete's use watch to capture data and based on those datapoints our goals were dependent.
    - Pipeline-This is for people who don't have enough data, they will be explaining their problem here .In our pipeline we have to add iterations(feedback from the client and doing modifications)
    - EDA-Good to add graphs(we shouldn't rely on last semesters reports),missing data-how we deal with that ,variable type-categorical or numerical ,how our data looks like. it will be good if we can add overall steps of eda.
    - we can split eda in to two slide and description about TSS should be added here
    - Related work-we should be careful when adding the references
    - Models-Brief description about the models we are using, try to add about cross validation, hyperparameter tunning. Good to have comparison of models.
    - Results-if all the athlete's have similar graphs we can add one if they are different its good to add all
    - Share the presentation recording with the client (mandatory)

- Draft report by 12-10-2020
- Meeting-13-10-2020
